DETAILED ACTION

1. This action is in response to an election requirement filed April 21, 2006. An informational disclosure statement (IDS) filed July 21, 2005, has been considered. Applicant's election of the claims of Group I (claims 1-22) without traverse is noted. Nonelected claims of Group II (claims 23-26) are withdrawn from consideration. The restriction is deemed proper and therefore made final. An action on the merits of claims 1-22 is included in this Office action. Figures 1-3 of the instant application are deemed **PRIOR ART** in view of applicant's disclosure in the instant application specification.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-3, 6, 7, 10-13, 17, and 18 are rejected under 35 U.S.C. 102(b) as being anticipated by Figures 1 and 5 of Carter. Note the valve body 14 including a diaphragm 14a, a supply reservoir (for oxygen), an inlet having a restricted passageway and an outlet 24a. Note the enlarged passageway 122a which provides a increased pressure force on the diaphragm. The recited geometric dimensions and force recitations are deemed design choice and are easily a function of a predetermined parameters of the device of Carter. The timing gas chamber recitation is readable on the chamber controlled by pressure through 26a.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(f) or (g) prior art under 35 U.S.C. 103(a).

6. The factual inquiries set forth in *Graham v. John Deere Co.*, 148 USPQ 459, that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or unobviousness.

7. Claims 4, 5, 8, 9, 14-16 and 19-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Carter in Danon. The claims are readable on the patent to Carter with the exception of a sintered bronze filter as taught by filter 12 of Danon. in order to filter the oxygen of device of Carter.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Note the patents cited in the IDS in particular: Zaiser et al (flow controller) and Frye et al (a gas flow device including a spring (Figure 7)).

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to A. Michael Chambers whose telephone number is 571-272-4908. The examiner can normally be reached on Mon-Thur. 6:30am-5:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Eric Keasel can be reached on 571-272-4929. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
